

RE-USE

P.M.P. SPA  
ADVANCED ELITE

## RESPECT FOR THE ENVIRONMENT

### Re-use

To minimize the  
environmental impact

**TARGET**

**0 WASTE**

OF CLOTHES HANGERS

## CUSTOMIZED SOLUTIONS

**Re-use** service:

**Ad hoc project**

**Specific customer needs**

**No geographical limit**

## STRONG SAVING FOR THE CUSTOMER

The **Re-use** service can have several advantages for the customer depending on how it is set up. There is an immediate saving in terms of:

- Waste disposal
- Taxes
- Packaging

# HOW DOES IT WORK?

## 1. COLLECTION

The process begins from the store: procedures for the correct separation of the hangers used will be defined (example: by model / size).

## 2. TRANSPORT

The hangers used, according to the defined procedure, are transported to our recovery centers in Italy.

## 3. SELECTION AND RECOVERY

In our centers the hangers are selected, further divided and reconditioned

## 4. STOCK AVAILABLE

The selected hangers, reconditioned and those obtained from recycled raw materials are available in our warehouses

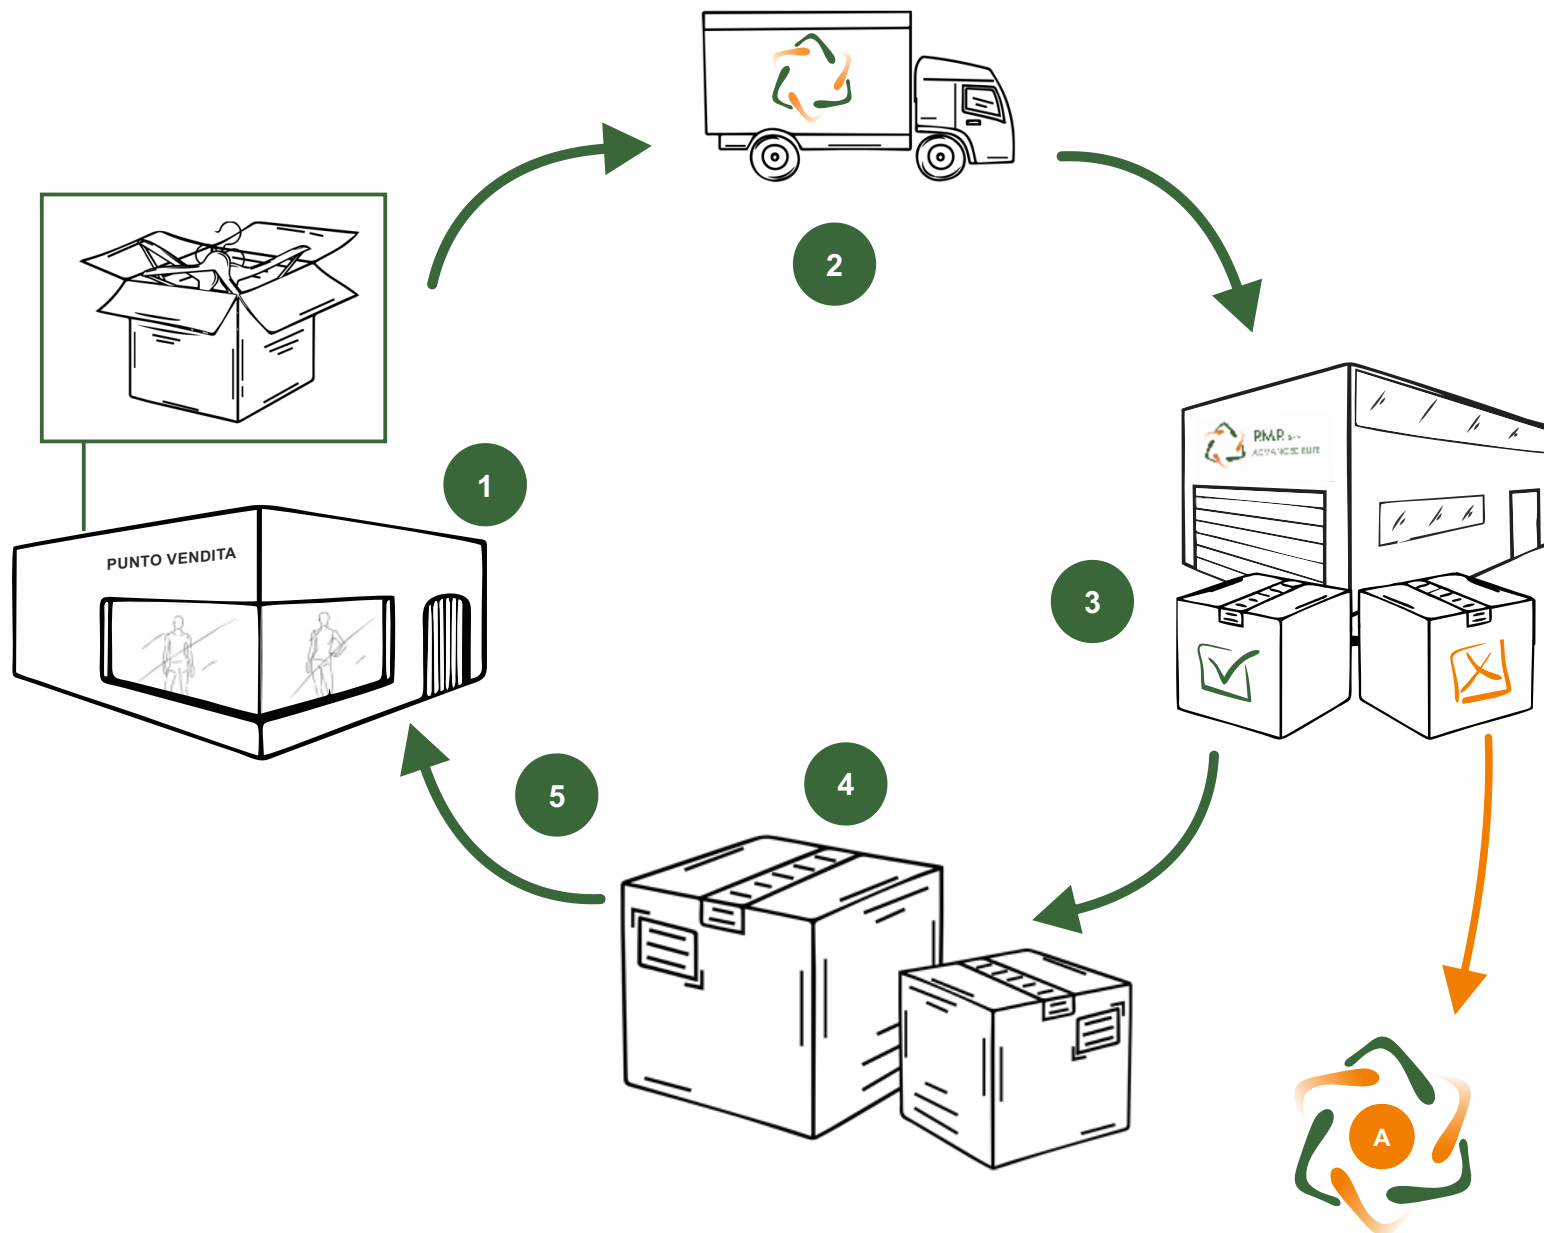

## 5. DISTRIBUTION TO THE CUSTOMER

Delivery to the customer's requested destination (shop, ironing, workshops..).

## A. WASTE RECYCLING

Hangers that cannot be reused for quality defects are destroyed by separating the various components (metal, plastic ...).

The plastic component is processed and regenerated, the rest of the materials are sent to external centers to be in turn recycled.
